Printing Recommendations

KHYXX DIGITALS • WEDDING STATIONERY

Tips for getting crisp, beautiful prints from your Khyxx Digitals template. Every print shop works a little differently, so always confirm their requirements before you pay.

1. Choose the paper

- **Weight:** 250–300 GSM gives a sturdy, premium feel that suits invitations and details cards.
- **Finish:** linen or textured matte board looks elegant and hides fingerprints. Smooth matte works well too.
- Very thin paper (under about 150 GSM) can feel flimsy and may show the print through the back.

2. Export the right file

- In Canva, click **Share** → **Download** and choose **PDF Print**.
- If your shop uses bleed (extra background that gets trimmed), tick **crop marks and bleed**. Ask the shop what bleed size they want; 3 mm is a common one.
- If the shop asks for CMYK colors, ask whether they will convert the file for you. Canva Pro can export in CMYK directly.
- Keep a PNG copy to send to guests online.

3. Do a test print first

Screens glow and paper does not, so colors almost always look a little different in print, especially soft pastels and blush tones. Print **one copy** first, check the colors and the text size, then print the full batch.

4. Check the size

- Tell the shop the finished size of your design (you can see it in Canva under **Resize** or in the page details).
- Buy envelopes only after you know your final card size, and leave a little room so the card slides in easily.
- If you plan to cut the cards yourself, use a paper trimmer and the crop marks.

5. Pre-print checklist

- Names, date, time, venue, and RSVP details are all correct.
- Any QR code or link scans correctly from the exported file.
- Text is not too close to the edge of the page.
- Photos look sharp and not stretched.
- Someone else has proofread the whole design.

Allow extra time: print shops get busy around wedding season, so order your prints at least a few weeks before you need them. We don't endorse any particular print shop; choose one you can visit or reach easily, and ask to see paper samples.
